

Tier

Designed by Workplace Projects

The Tier range is a collection of 3-tiered, auditorium seating modules, which can be configured to seat multiple groups for focused meetings and presentations.

Designed and developed for effective learning, the modules can be combined to create small personal groups or large-scale conference environments. Back and side end-run balustrades offer semi-visual privacy and points the users focus forwards, whilst also adding seating security. Tier takes inspiration from Greek theatre architecture, and the use of chunky poplar plywood enhances this aesthetic whilst adding robustness.
