

Bask

Design by Jo Day from Rivr

Bask is a day bed lounge inspired by the new ways of working. Upholstered with a soft seat pad and back, and with built-in power, Bask is the ideal product to encourage users to break away from their desks and explore new areas in the office.

The movement away from desks and meeting rooms to more informal settings is understood to have a positive influence on the mental wellbeing of employees as they allow themselves to unwind.

Bask

Day bed lounge
