

Shila

by Javier Cuñado

Offering multiple choices, Shila is a chair that adapts to you.

It's a flexible solution provided in a simple form. Inspired by an idea to meet both office and contract market, this collection offers numerous customisation options including a series of bases, optional armrest and seat cushion. Not only does Shila serve as a guest chair, but also can be a bench with comfortable table top.

All that is available in a subdued colour palette that adds style to any space. Designed to create and elaborate "new efficiency" at work, this seating line promotes motivation, collaboration, movement and dynamism.
